The US Life Expectancy Gap
Difference between US and OECD
average life expectancies, 1960-2015

Data: OECD. After a chart by Christopher Ingraham, Washington Post, December 27th 2017.

Check list

- We described the context of our problem
- We clearly stated the questions that guided our project, and why we think they are important
- We located and accessed relevant data
- We correctly described how the data set has been obtained
- we constructed at least two good looking visualisations presenting the phenomenon that we are describing
- we clearly explained what conclusions we are inclined to draw and why
- we considered and clearly stated potential sources of errors and doubts
